

SMART SPIRAL[®]

REAL-TIME SPIRAL PERFORMANCE MONITORING

PREVENTATIVE SOLUTIONS FOR UNPLANNED DOWNTIME

As your partner with the solutions to help your business succeed, Ashworth offers the SmartSpiral® Monitoring System—an innovative application that provides real-time remote monitoring of multiple spirals at different locations.

Companies rely on the SmartSpiral Monitoring System to plan and prioritize maintenance costs, identify performance issues, prevent failures, and reduce repair costs. SmartSpiral's easy-to-use technology, can be accessed via computer, tablet, or a smartphone, simplifies your manufacturing processes, and makes production management easier.

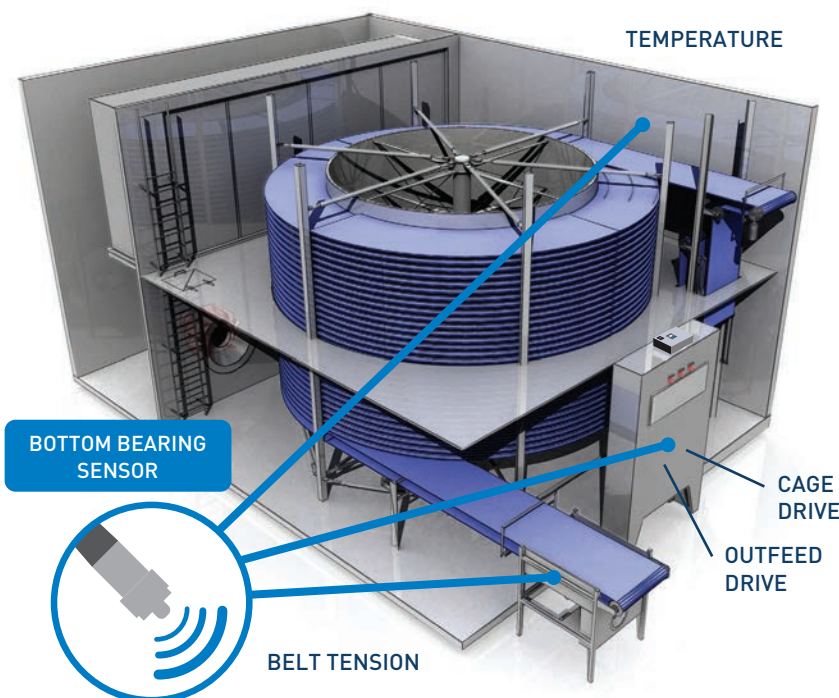

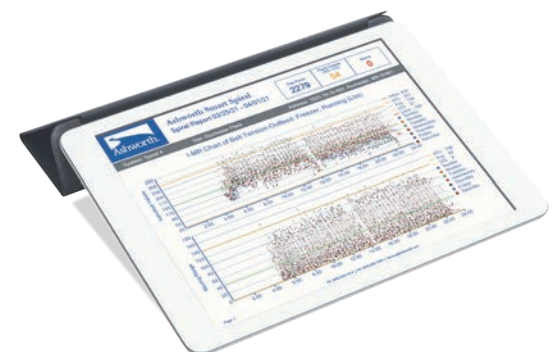

By alerting plant engineers and managers with notifications regarding potential system failures, SmartSpiral ensures peace-of-mind by predicting problems before they occur. Alarm notifications include identification of fault, the date and time that an issue was detected, and the location of the facility.

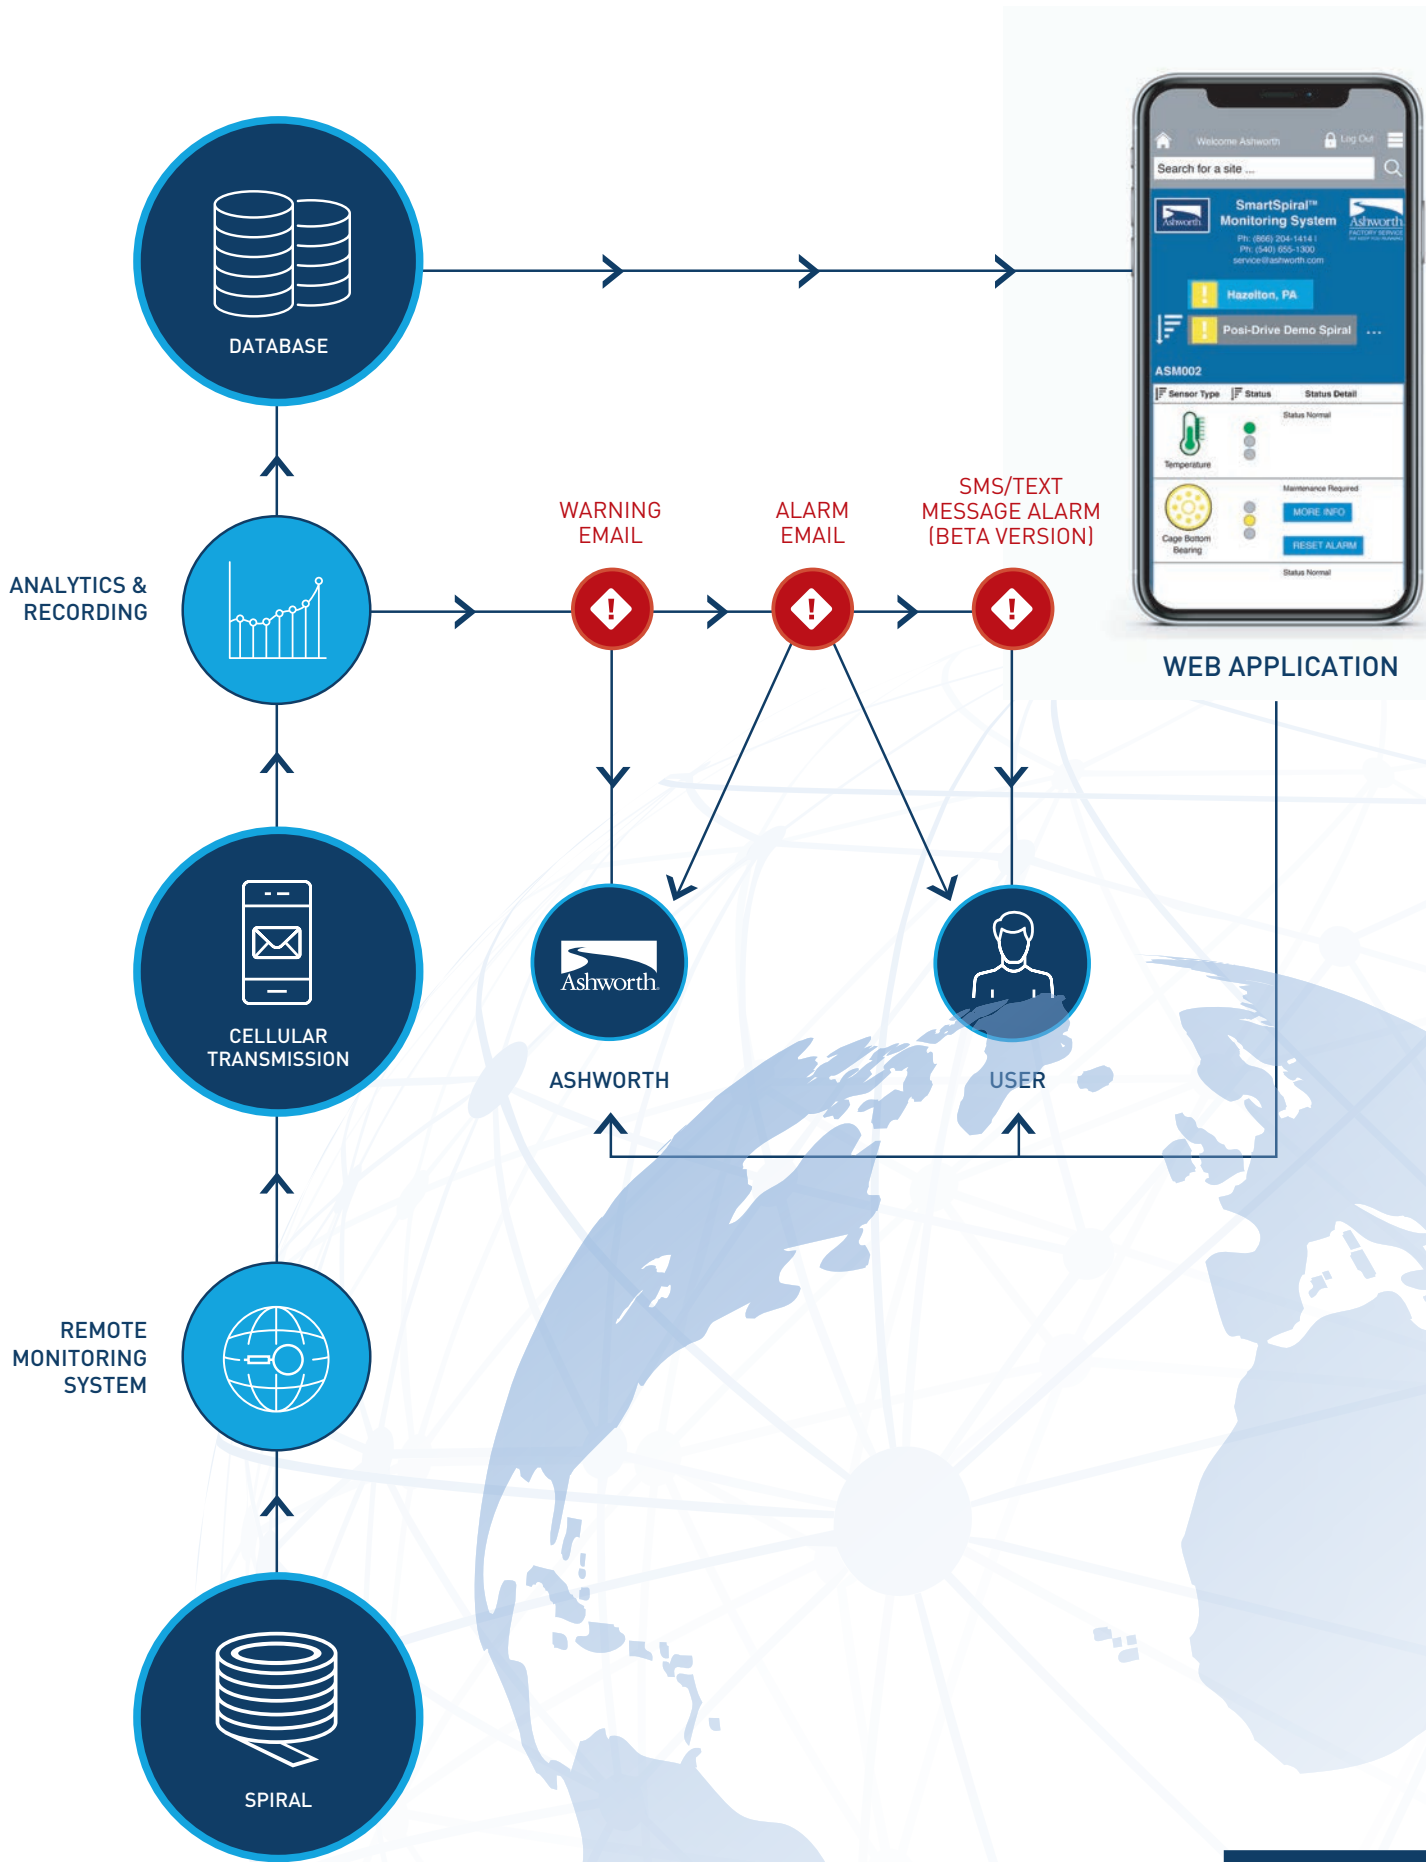

SMARTSPIRAL AT A GLANCE:

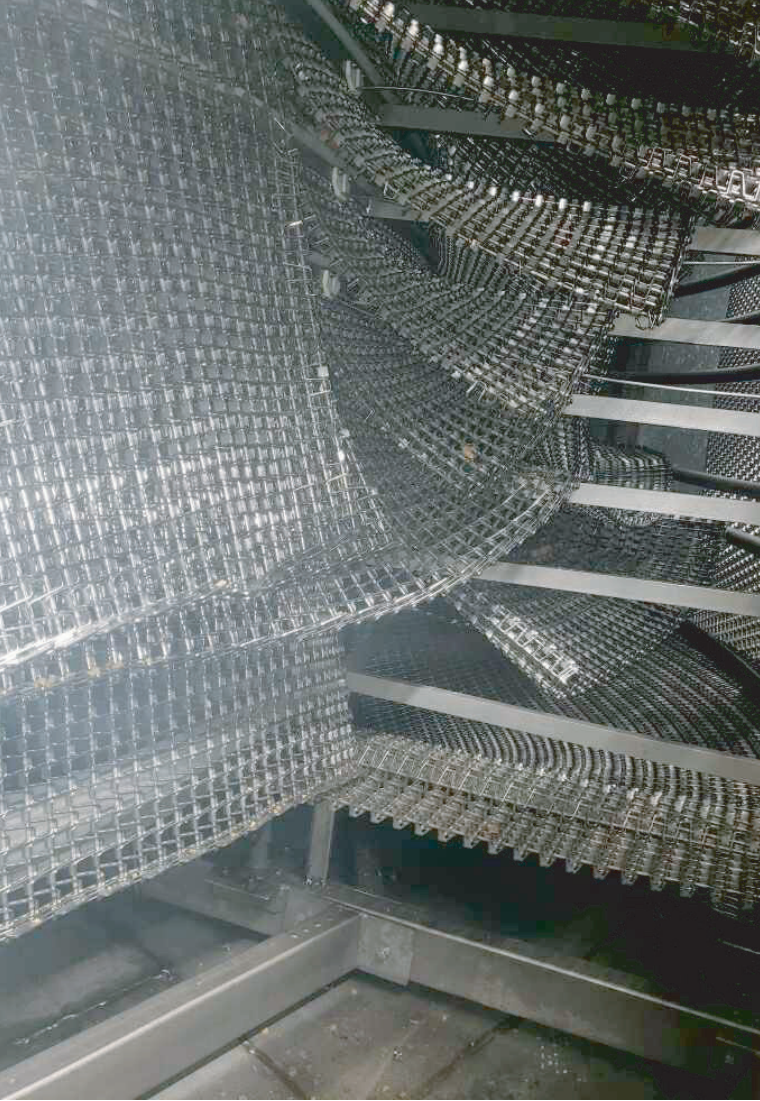

- Real-time spiral performance data anytime, anywhere
- Continuous monitoring of the bottom bearing, spiral and motor power with expandability for 3 more sensors
- Features the industry's first patented bottom bearing wear sensor
- Secure stand-alone monitoring, independent of plant's network
- Access to multiple spirals and plant locations from one screen
- Easy-to-see user alerts and system feedback

THE SMARTSPIRAL ADVANTAGE

- Increased production efficiency
- Identifies performance issues
- Predictive vs. preventative monitoring
- Reduces maintenance costs
- Prevents system failures
- Minimizes downtime
- Extends equipment life

YOUR TRUSTED PARTNER FOR SUCCESS

Companies around the world depend on Ashworth's quality products, reliable customer service, and innovative solutions to resolve problems and increase productivity. Ashworth Factory Service offers a full range of engineering services, including system refurbishment, troubleshooting, and belt installation.

On call 24/7/365, Ashworth Factory Service (AFS) experts provide companies peace of mind with decades of experience, quality workmanship, and comprehensive conveyor belt support.

Our AFS Team will work directly with your team to retrofit and implement Ashworth's SmartSpiral Monitoring System to meet your production needs, make your job easier, and keep your product schedule on track.

To learn how Ashworth can help you prevent production failures, visit our website www.ashworth.com or call us today at 800-682-4594.
